WSPP Counsel

Date: May 13, 2009

Re: Requests for EQR Data

---

WSPP Counsel (Wright & Talisman, P.C. (“WT”)) has been receiving requests for EQRs filed in the 2000-2002 or so timeframe.

We will respond to these requests efficiently, without WSPP incurring the cost. In some instances we have the electronic files members submitted to us for inclusion in an EQR. In other instances we have only the paper copies of the data as filed with FERC. Upon a request we will locate what is available, copy and provide the paper and/or provide the e-file, subject to the following conditions.

Costs of retrieval and research time, and copying costs, will appear on WSPP’s bill. We will bill the requestor for the amount, and credit WSPP’s account with all amounts received. Response costs incurred on this basis have run from under \$1,000 up to \$3,000, depending on the amount of paper involved.

Please direct requests to both Winnie Howard and Linda Young at the following addresses:
